RESPONSE

In response to the action mailed February 13, 2002, please amend the application as follows:

In the specification:

Paragraph beginning at page 2, line 15 has been amended as follows:

B<sup>1</sup>

-- A web browser program is executed on a client computer that is connectable to a plurality of server computers via a computer network. In general, the web browser program automatically reconfigures chrome of a user interface to the web browser program to provide a user access to any one of a plurality of groups of related information.--

Paragraph beginning at page 2, line 25 has been amended as follows:

B<sup>2</sup>

-- A chrome display program displays, on a chrome portion of the client computer display, chrome that corresponds to chrome specifiers in a chrome configuration database.--

Paragraph beginning at page 3, line 4 has been amended as follows:

B<sup>3</sup>

-- A chrome configuration processing program is configured to receive, from the plurality of "related information" servers, "related information designators. These "related information" designators are provided to the client computer based on the indication of the current server computer. The chrome configuration processing program provides the "related information"
